

## C6

HYBRID

600x600  
Form factor

Visible Light

UV-C radiation

**EMPOWER YOUR CLEANROOM WITH UV-C TREATMENT**  
**REDUCE THE RISK OF BIOCONTAMINATION**  
**REDUCE THE USE OF CHEMICAL TREATMENTS**

**C6** is a range of hybrid luminaires which include **visible light** emission and **UV-C radiation** decontamination process.

**Two fittings in the space of one** : within the volume of a 600x600 luminaire. This fitting is composed of two independent power supplies.

The product is designed to simplify its integration :

- The visible light emission is equivalent to the majority of 600x600 fitting.
- An average illumination of 500 Lux corresponds to an average irradiation of 0.5 W/m<sup>2</sup>, resulting in a **1 to 3 log reduction in bio-contaminants in 10 minutes** treatment, depending on their nature.

Several versions are available, **for sandwich panel mounting or modular structures**, with access from above or below.
